

## PRESS RELEASE

Embargoed for release after 8:00am SGT (UTC+8) on 20 June 2022

### 18<sup>th</sup> SIRC to open for registrations from today

Singapore, 20 June 2022 - Registrations for the Singapore International Reinsurance Conference (SIRC) open today from 8:00am SGT on the 18th SIRC website at <https://www.sirc.com.sg>. Registrants can enjoy savings of SGD300 when they sign up during the early registration phase which ends at midnight SGT on 31 August. The website also contains links for overseas delegates to make guest room reservations at the iconic Marina Bay Sands Singapore at specially contracted rates during the event, which is scheduled to run from 31 October until 3 November 2022 at the Sands Expo and Convention Centre.

Industry practitioners can also find details of the various partnership and meeting facilities packages for the event on the website. Among the industry stalwarts that have already signed up during the 'soft launch' phase include Lloyd's as Bilateral Meeting Room Partner; Munich Re as Technology Partner; Allianz Re, Gallagher Re and Guy Carpenter as Gold Partners; as well as Catlin Re Switzerland (AXA XL), Korean Re and Odyssey Re as Silver Partners, while a few others are still mulling over the options. Meanwhile, several other companies have already snapped up exhibition desks, meeting rooms and tables on the conference floor ahead of the much-anticipated return of one of the must-attend events on the global reinsurance conference calendar.

"The theme for the 18<sup>th</sup> SIRC 2022 will be '**RE-CONNECTING ... RE-SHAPING THE FUTURE!**,'" said SRA Executive Director Jeffrey Yeo. "This strong support reflects the positive sentiment of the industry after enduring two years of restrictions and disruptions to lives and livelihoods forced upon us by the COVID-19 outbreak. There is certainly 'pent-up' demand to re-connect in-person with clients, business partners and colleagues."

SRA Chair Marc Haushofer added, "The second part of the theme addresses the challenges that the industry faces today, with looming inflation, economic disruptions, geopolitical tensions being thrown into the mix as the industry seeks to re-shape itself amidst the global movement towards net zero sustainability and climate resilience. We are putting together a conference programme comprising a blend of keynotes, fireside chats, panel discussions and roundtables to dissect these issues, some of which could be curated by SRA's WiRE sub-committee as well as the 'next generation' practitioners."
